

Title : Scenarios

Time : 11:00 – 12:00, Oct 26

Chair : Wilfried Winiwarter

Attendees : Almut Arneht, Wim de Vries, Adrian Leip,
Clare Howard

Minutes by : Max Posch

Aim

Provide concepts for harmonization of scenarios (WP21 task 1)

Presentations

Topics discussed with Issue, decisions/conclusions and actions

Issue: Available emission scenarios (RCP) for air pollutants not necessarily appropriate

Decision: use HTAP scenarios based on GAINS/UNEP-IEA scenarios (2030; possibly extend to 2050)

Action: support development of HTAP scenarios (expected for mid-2012)

Issue: consistency between HTAP (emissions) and RCP (climate) scenario

Decision: use RCP closest to HTAP as climate scenario

Action: upon availability, check to which RCP HTAP scenario fits

Issue: collect input from modellers

Decision: fit scenario questionnaire into general questionnaire

Action: Wilfried to prepare emission scenario needs starting from Adrian's NEU model questionnaire
